Emna Ben Ayed · 1st

Cloud & Data Project Manager

March 27, 2024, Emna managed Arpit directly

I worked with Arpit for around one year on a strategic BI project for a multinational company in the food services industry.

Arpit served as the Power Platform Tech lead on our team, playing a key role in designing and building a solution tailored for Finance users across more than 60 countries. He also supervised and mentored other members of our development team and helped upskilling them.

What I deeply value about him is his commitment to excellence in his work and his ability to effectively communicate with both technical and non-technical individuals.

Arpit's dedication, expertise, and interpersonal skills have been invaluable assets to our team, and I have every confidence that he will continue to excel in any project he undertakes.
